Important

- This is not an exam.
- This is not a bug hunt, you won't be evaluated based on number of bugs logged.
- You are limited in time, don't try to test everything.
- Try to test systematically not chaotically.
- I will review your bugs from the perspective of a person that just joined the project.

Practice task #1

- Make exploratory testing session of <http://www.shino.de/parkcalc/>
- Test notes template in the materials folder
- **Context:** This is a parking calculator for an airport. You are asked to test it and find any significant issues within an hour.
- **Length:** ~ until 20.20
- Deliverables - defects and the test notes - **use English!**

Questions
