Environment: Chrome, Firefox, Edge

Description:

Summary: Validation of the email field is allowing users to register any kind of string as email, including blank string.

Expected Result: Only valid emails should be allowed. Error message is displayed in case of invalid or blank email

Actual Result: Any kind of string can be entered and will be accepted

Steps to reproduce:

1. Navigate to ITeventz.bg
2. Scroll down to news feed section
3. Enter blank/aaaaaaaa as email
4. Accept site rules
5. Click Sign in Button

Test Case: Cant register for news feed with invalid or blank email

Test Case: Register for news feed with invalid or blank email

Test Case: Can register for news feed with valid email [7-50]

Title: User cant search for training by city and year combined

Title: Dropdown options for filtering trainings by city and year reset each other

Severity: 3/Major

Priority: High

Environment: Chrome, Firefox, Edge

Version: 1.4, 1.7, 2.3, Beta

Description:

Summary: Its not possible to search for specific year and city at the same time.

User option is not persisted properly during page refresh.

Expected Result: Should be possible to combine both filters(city, year)

Actual Result: Filters cant be combined

Steps to reproduce:

1. Navigate to iteventz.bg
2. From main menu click on Trainings link
3. Select Year and City
4. Observe behavior

Test Case: Search for trainings

1. Navigate to homepage
2. From main menu click on Trainings link
3. Select Year=2017 and City=Sofia | Only trainings for Sofia(2017) should be visible
4. Observe behavior

Test Case: Can search for trainings

Title: User is able to select input and output file type to be identical

Title: Identical file types can be selected for input/output conversion

Title: Dropdowns for input/output file type contain invalid/duplicate options

Severity: 4

Priority: Medium

Environment: Firefox, Chrome, Edge

Description:

User is able to select identical input/output file type which is basically not suitable for conversion at all.

Expected Result: Only valid file types are displayed

INPUT: PDF OUTPUT: WORD, PPT

INPUT: PPT OUTPUT: PDF

INPUT: WORD OUTPUT: PDF

Actual Result: Same type can be selected for both dropdowns

Steps to reproduce:

1. Navigate to WordToPdf.com
2. Select input file type = PDF | Select output file type = PDF

Test Case: Can't convert to identical file type

Test Case: Convert to identical file type
